Wanted: Vegetable Gardeners

More than 1,700 gardeners registered to rate varieties in the first two years after the site launched in January 2005. Those gardeners – representing every state and most Canadian provinces – contributed the first 3,000 vegetable variety reviews.

Join the fun. Visit the site and share your knowledge. Help us create **Most Popular Varieties** lists tailored for every state and frost free zone.

Share your vegetable gardening experiences so we can learn from each other, preserve knowledge and celebrate the benefits of diversity in our vegetable gardening.

This is a beautiful assortment of color and flavor. Each one is slightly different in productivity and taste, but overall excellent. Something I grow every year.

Produced way more kale than we could possibly eat. Very ornamental.

Beautifully colored, great tasting, and highly productive. Consistently performs well all season long and in a wide-range of weather conditions. Stems and leaves hold color even after cooking (if gently cooked). Makes a wonderful ornamental border.

Beautiful looking, space saving, huge leaves! Season long performance with a cut-and-come-again habit. Secondary leaves are as big and bountiful as the first. Delicious steamed gently and seasoned.

The screenshot shows the website's header with the title 'Vegetable Varieties for Gardeners' and navigation links for 'Register/Login', 'My Varieties', and 'My Profile'. Below the header is a 'Welcome!' section with a search bar and a 'View ratings' section. A 'Rate varieties' section encourages users to share their experiences. A 'Need Help?' section provides instructions for new users. On the right side, there is a 'Most Popular Varieties' list with 10 items, each with a star rating and the number of ratings.

Engaging Youth

Youth interviewers joined the effort in 2007. They seek out gardeners in their communities to gather local opinions on specific varieties, and then they share their findings online.
